

AMPowerLink 90-Day Connected Care Pilot

Experience Connected Care — Without Replacing Your Systems

AMPowerLink bridges hospitals, providers, and community partners into one connected referral and navigation network.

Our 90-day pilot gives your organization a firsthand look at how streamlined coordination and smart automation reduce delays, prevent gaps, and keep patients moving forward— without requiring new logins or disrupting your EHR.

Pilot Objective

To demonstrate measurable improvement in care coordination and communication across transitions of care by using AMPowerLink's connected workflow system.

What's Included

Secure EHR Integration: Read-only connection through Redox (Epic, Athena, eCW,

Cerner) Role-Based Dashboards: For providers, navigators, and admin users

Referral Lifecycle Tracking: From initiation to completion with real-time

updates Smart Alerts: Notifications for accepted, pending, or incomplete

referrals

Analytics & Insights: Pilot-end report on time savings, referral closure, and patient engagement

Expected Outcomes (Target Benchmarks)

Key Metric Target Outcome

Referral closure time ↓ 60% reduction

Administrative burden ↓ 40% fewer calls and faxes

Missed follow-ups ↓ 30% fewer no-shows

Care loop visibility 100% trackable across systems

Timeline

Week 1–2: Setup & configuration (connect your EMR, onboard

users) Week 3–10: Active pilot with live referrals and navigation

support Week 11–12: Results analysis and improvement report

Why Join

No disruption to current workflows or EMRs

Real-time visibility for all care partners

Proven structure for scaling coordination

HIPAA-aligned, Redox-enabled, and AWS-hosted

Next Steps

Be among the first to experience closed-loop care in action.
